A dolphin is a man-made marine structure that extends above the water level and is not connected to shore.. Dolphins are usually installed to provide a fixed structure when it would be impractical to extend the shore to provide a dry-access facility, for example, when the number of ships is greater than can be accommodated by the length of the berth/pier.

The course of Gulf history was forever changed with the worst environmental disaster the U.S. has ever seen. The BP Deepwater Horizon oil disaster leaked 210 million gallons of oil and 1.8 million gallons of chemical dispersants into the Gulf, coating, sickening and killing wildlife. The oil disaster also paralyzed the local economy and distressed communities along its shores.
