Geology (geo: "earth"™, logos: "knowledge or study of"™) is the study of planet Earth. Geology is in many ways the most complex of sciences, as a complete understanding of the workings of the earth requires training in mathematics, chemistry, physics, biology, and astronomy. The study of the Earth brings mathematics, chemistry and physics alive.

Recent revelations about the geology of the deeply buried Precambrian rocks of the state ( see Ohio Geology , Winter 1996 ) indicate that the Cincinnati Arch overlies a sediment-filled rift basin that formed in Late Precambrian time. The area underlain by the rift basin appears to be a comparatively stable crustal block surrounded by subsiding basins.
