CASH FLOW RATIO AS A MEASURE OF PERFORMANCE - St Clements

Network performance refers to measures of service quality of a network as seen by the customer.. There are many different ways to measure the performance of a network, as each network is different in nature and design. Performance can also be modeled and simulated instead of measured; one example of this is using state transition diagrams to model queuing performance or to use a Network Simulator.

For comparative studies of country performance we use the change of indicators (input-research funding and output-top 10% publications) instead of level of funding (e.g. in absolute numbers).. We find that increasing the share of competitive funding " instead of institutional funding does not result in a more efficient system.

Funding, evaluation, and the performance of national

Stall Speed at $C_{lmax}=x.xx$ - This appears only on the in-flight analysis, and only if the wing area and airframe weight were specified for the model. It indicates the range of speeds which are at or below the aircraft's stall speed at the maximum lift coefficient (i.e. the speed below which the aircraft cannot fly).

The Organisation for Economic Co-operation and Development defines the employment rate as the employment-to-population ratio. This is a statistical ratio that measures the proportion of the country's working age population (statistics are often given for ages 15 to 64) that is employed. This includes people that have stopped looking for work. The International Labour Organization states that a ...
